20151220	7		2	2	Male incubating deep in nest, female roosting in pine east of nest 7:10 AM
20151220	7		2	2	Female eating at nest then settled deep; male brought grass x2
20151221	8		1	1	Adult incubating deep in nest 9:00 AM
20151225	12		2	2	One adult deep, other roosting next to nest
20151227	14		1	1	Female incubating deep in nest 7:30 AM
20160102	20		2	2	Incubation duties exchanged 10:42 AM; Jewel added stick
20160110	28		1	1	One adult deep in nest, incubating
20160115	33		1	1	One adult deep in nest, incubating. Rain and cool weather
20160116	34		1	1	Dense fog and cool temps; 1 adult deep in nest incubating
20160117	35	0			CALCULATED EXPECTED HATCH DATE JAN 17
20160117	35	0			Severe thunderstorms and high winds early morning JAN 17
20160117	35	0	1	1	Fallen branch covers left side of nest; female deep incubating or brooding
20160118		1		?	No adults seen at nest but partly obscured-- ?adult out of sight
20160121		2	1	1	Pride photographed feeding eaglet(s); other adult not seen or hidden
20160120		3			Eaglets and/or eggs all presumed lost due to storm
20160122		4			Multiple observations -- no adults visible on or near nest
20160123		5	2	1	Male photo deep in nest, incubating/brooding? Female roosting to west
20160123		6			Two adults photographed flying 1.4 miles SE of nest 7:41 & 7:43 AM
20160124		6	2	2	Both adults on nest; report of "feeding" not documented
20160126		7			No eagles seen on or near nest by morning or afternoon observers
20160128		9	1		One adult in dead pine east of nest
20160129		11			No sightings of adults at or near nest
20160129		12			No sightings of adults at or near nest

20160202		12							Pride and Jewel chasing imm eagle 1.4 miles SE of nest - copulation attempted
20160205		16		1			1		One adult in nest at 6:55 AM
20160208		19					1		One adult in nest at 7:04 AM
20160210	1								CALCULATED DATE SECOND CLUTCH OF EGGS LAID FEB 10
20160211	2			1			1		One adult in nest at 4:00 PM
20160214	4			2			2		Both adults on nest, looking down
20160216									Severe storm causes large branch to cover left front side of nest
20160217				1			1		Adult incubating deep in nest 9:00 AM
20160305	24			1			1		Male sitting deep in nest
20160316	35	0							PRESUMED FIRST EAGLET HATCHED MAR 16
20160321		5		1	1		1		Photos of Jewel feeding at least one eaglet
20160324		8		1	1		1		Photos of Pride feeding at least one eaglet
20160401		16		2	2		1		Photos of second eaglet
20160407		22		2	2		2		Both eaglets actively being fed
20160410		25		1	2		1		Only one eaglet appears active-- concern about smaller one
20160411		26		1	1		2		Older eaglet photographed believed to have killed younger one
20160415		30			1				One eaglet in nest, no adults seen
20160416		31			2				TWO eaglets photographed in nest?
20160420		35		1	1		1		One adult and one eaglet on opposite sides of nest
20160421		36		1	1				Adult near nest, 1 eaglet see and possibly a second
20160429		44		1	1		1		One adult and one eaglet photographed
20160504		49			1				Eaglet looks healthy, no second eaglet or adults seen
20160507		52			1				One eaglet in nest, no adults seen
20160510		55		1	1				One eaglet in nest, one adult in melaleucas
20160513		58		1	1		1		One eaglet and one adult on nest
20160520		65			1				One eaglet very active, flapping
20160526		71			1				Eaglet helicoptering
20160527		72		1	1		1	1	Eaglet quiet, male adult at nest, feeding
20160616		92		1		1			Eaglet roosting in branch above nest FLEDGING PRESUMED

20160622	98	2	1	Eaglet and both adults roosting -- male looks "thin"
20160627	103		1	Eaglet sitting in nest, no adults seen
20160630	106		1	Eaglet sitting in nest, no adults seen
20160706	112		1	Eaglet roosting in melaleucas west of nest, no adults seen
20160717	123		1	Eaglet roosting in melaleucas 1 mile SE of nest
20160729	135	1	1	Adult and juvenile seen flying from direction of nest to Sunset Lakes at sunrise
20160730	136	1	1	Adult and juvenile seen flying SE towards Sunset Lakes before sunrise

2016-2017 Nesting Season

DATE	EGG DAY	HATCH DAY	FLEDGE DAY	ADULTS IN VIEW	NESTLNGS	FLEDGLNGS/JUV	ADULTS ON NEST	FEEDINGS	NOTES
20160801									One adult on melaleucas west of nest at 7:11 AM
20160819				1		1			Juvenile following adult from nest area towards Sunset Lakes at 7:10 AM
20160829						1			Juvenile flying from nest area towards Sunset Lakes at 6:48 AM
20160901						1			Juvenile flying from nest area towards Sunset Lakes at 7:15 AM
20160903				1					Adult flying from nest area towards Sunset Lakes at 7:06AM
20160906						1			Juvenile flying from nest area towards Sunset Lakes at 7:06 AM
20160910				2		1			Two adults and 1 juvenile flying SE towards Sunset Lakes at 7:07 AM
20160912				1					One adult on melaleucas west of nest at 7:15 AM
20160916						1			Juvenile flying from nest area towards Sunset Lakes at 7:20 AM
20160918				2					Two adults flying from nest area towards Sunset Lakes at 7:09 AM
20161009									No activity at nest
20161031									No activity at nest
20161107				1					Adult flying from nest area towards Sunset Lakes at 7:06 AM
20161108				1					Adult flying from nest area towards Sunset Lakes at 7:10 AM
20161114				2			2		Two adults on nest

20161115			2			Two adults roosting in melaleucas west of nest at 6:54 AM
20161118			1	1		One adult in nest at 6:45 AM
20161125			1	1		One adult fly-by 7:05 AM and one at nest at 10:00 AM
20161128			2	2		Both adults interacting on nest (bill touching) at 10:20 AM
20161203			2			Both adults roosting singly near nest- female at 8:00 AM - male at 10:30 AM
20161206			1	1		One adult in nest at 6:56 AM
20161209			1	1		One adult in nest at 6:47 AM
20161211			1			One adult flew past nest at 8:45 AM but none roosting or on nest
20161223			2	2		Both adults interacting on nest (bill touching) at 2:00 PM
20161227			2	2		Both adults at nest; male deep possibly incubating?
20161228			2	1		Female high on nest did not appear to be incubating; male roosting east of nest
20161230			2	2		Both adults continually near nest; male brought food; nest restoration
20170104	1		1	1		Female continuously deep in nest almost certainly incubating
20170104	1					INCUBATION BEGAN BETWEEN JAN 1-4; Hatch predicted FEB 5-8
20170107	6		2	1		Male incubating deep in nest; female preening on melaleucas west of nest 8 AM
20170113	12		1	1		Male incubating deep in nest; female not seen, JAN 13 & 14
20170113	12					Immature (late 1st/early 2nd year) sighted over Sunset lakes, Miramar
20170117	16		2	2		Male incubating, female brings in prey item; no evidence of eaglets feeding
20170122	21		2	2		Pair exchanges incubation duties
20170126	25		1	1		One adult deep in nest, incubating
20170203	33		1	1		Female deep in nest, incubating
20170204	34		1	1		Male incubating deep in nest
20170205	35	0				FIRST EGG HATCHED FEB 4-5
20170206		1	2	1		Female sitting high and looking down; Male roosting very attentive to observers
20170208		3	2	1		Female presumably tending eaglet, feeding not confirmed; male on guard

20170212	7		2			2	1	Male seeing transferring food but eaglet not visible; both adults on nest
20170216	11		1	1		1	1	Eaglet photographed being fed by male
20170224	19		1	1		1		Eaglet photographed in nest, female on side branch
20170227	22		2	2		2	1	Second eaglet seen fed by female and photographed; male brings in prey
20170303	26		2	2		2	1	Both parents on nest, male brings prey and feeds 2 eaglets
20170309	32		2	2		1		Female at nest, 2 eaglets interacting peacefully
20170317	40		1	2		1		Both eaglets well after heavy wind storm; female roosting at nest
20170407	61		2	2		1		Eaglets quiet, male roosting at nest and female roosting on Melaleucas
20170414	68		2	2		2	1	Both parents and 2 eaglets on nest, feeding (photos)
20170425	79		0	2		0		Both eaglets seen helicoptering the past few days
20170428	82		0	1		0		Female eaglet fledged
20170430	84		0	1	1	0		Both eaglets back on nest
20170431	85		0	1		1		Only one eaglet on nest
20170506	90		0		1	0		Smaller (male) eaglet fledged and reportedly struck power line, missing; sibling flying overhead, later found uninjured
20170507	91		0		1			One fledgling on nest, presumed to be smaller (male)
20170514	98		1		2	1	1	One fledgling on nest, one flying, adult returned, feeding
20170608	123		0		2			One fledgling returned to nest, other flying and roosting

2017-2018 Nesting Season

DATE	EGG DAY	HATCH DAY	FLEDGE DAY	ADULTS IN VIEW	NESTLNGS	FLEDGLNGS/JUV	ADULTS ON NEST	FEEDINGS	NOTES
20170827				1			1		Adult seen 6:50 AM before sunrise SE of nest and then at nest 9:45 AM
20171202				1			1		One adult roosting at nest
20171206				1			1		Female sitting deep in nest 15-20 minutes then stood higher for over 30 minutes

20171207	0					PRESUMED FIRST EGG LAID
20171210	3		2		2	Male deep in nest, female brought in nest lining materials
20171214	7		2		2	Female incubating deep, male also occupying nest
20171220	13		2		1	Male incubating, female roosting nearby
20180101	25		2		2	Pair exchanged incubation duties 10:00 AM
20180106	30		2		2	Incubation exchange with both adults looking down - Egg pipping or hatching?
20180110	34			1		PRESUMED FIRST EGG HATCHED
20180112		2	2	1	2	Eagles observed feeding an unseen eaglet
20180114		4	2	1	2	Male dropped prey while female continued brooding (cold and windy morning)
20180122		12	2	1	2	Exchange of brooding duties; female shading unseen eaglet(s)
20180124		14	2	2	2	Female observed feeding unseen eaglets at two positions in nest (photos)
20180129		18	1	2	1	First photo of one eaglet being fed by male
20180131		21	2	1	2	Photo of single eaglet being fed by male
20180209		30	1	1	1	Photo of one very large eaglet being fed by female
20110211		32	2	1	2	Single eaglet and both adults on nest; no one has seen a second eaglet
20180213		34	1	1	1	One very active eaglet present in nest; mortality of 1st eaglet presumed late January 24-29
20180225		46	1	1	1	One eaglet and female on nest
20180308		52	1	1	1	Eaglet now quite large and has lost down; adult at nest
20180312		61	1	1	1	Distinctive markings noted on bill of female in nest with eaglet
20180325		74		1		Eaglet flapping wings; adults not seen at nests past few days by observers
20180331		80		1	1	Eaglet branching and helicoptering ; adult male roosting next to nest
20180402		82		0	0	Nest appears unoccupied, possibly fledged
20180403		83		0	0	Repeated observations confirm that eaglet fledged APRIL 2
20180404		84	2			Adults calling together (photo) in nest tree, eaglet not seen
20180406		86			1	Fledgling eaglet returned to nest tree; "practicing" short flights
20180411		91	1		1	Fledgling and adult female roostin just above nest

20180418	98	1	1						Eaglet and adult female roosting near nest
20180521	101	2	1	2					Both adults on nest with eaglet
20180505	113	2	1	2					Both adults and eaglet took turns eating prey at nest
20180519	127		1						After no activity past week, eaglet seen on nest eating prey
20180529	137		1						No sighting past 10 days but eaglet was eating on nest today
20180602	141		1						Eaglet roosting next to nest (photo)
20180622	161	1	1						Adult and juvenile fly over SW Miramar wetlands SE of nest on JUN 22 & 23
20180728	189	1	1						Adult and juvenile fly over SW Miramar wetlands SE of nest on JUL 28 photos

2018-2019 Nesting Season

DATE	EGG DAY	HATCH DAY	FLEDGE DAY	ADULTS IN VIEW	NESTLNGS	FLEDGLNGS/JUV	ADULTS ON NEST	FEEDINGS	NOTES
20180801				2					Both adults seen flying over NW Miramar from nest area at sunrise
20181007				2					Both male and female roosting near nest
20181026				2					Photos of male and female roosting close together at nest, Oct 26 & 27
20181111				1					Female adult roosting in tree east of nest, no nest building observed
20181117				2			2		Pride and Jewel copulated successfully (Photos)
20181204				1			1		Female deep in nest for extended period; first egg may have been deposited
20181205	0								ESTIMATED FIRST EGG DEPOSITED DEC 5 or 6
20181214	9			2			2		Both male and female taking turns incubating deep in nest, also on DEC 15
20181220	15			1			1		Female incubating deep after sever storm with no damage to nest

20181222	17		2		2		Pride & Jewel exchange incubating duties; large branch obstructs view of nest
20190103	34		2		2		Incubation exchange; behavior suggests an eaglet may be present
20190105	31		1		1		Male incubating deep
20190108	34		1		1		Male incubating deep
20190110	36		1		1		Female sitting higher and may be tenting one or more eaglets with wings
20190110		0	2	1	2		PRESUMED HATCH DATE JAN 9 or 10
20190112		2	2	1	1		Prey brought in and adults stood high feeding suspected but not documented
20190119		9	1	1	1	1	Female tore at prey and appeared to be feeding one or more eaglets
20190123		13	2	2	2		No nestlings observed but tending and sheltering against wind documented
20190125		15	1	2	1	1	Female eating and feeding at two locations in nest- second eaglet suspected
20190128		18	2	2	2	2	Again emale seen feeding at second location but eaglet not yet seen
20190131		21	1	2	1	2	Two eaglets seen and photographed for first time
20190205		26	2	2	2	1	Parents chased interloper and fed one eaglet visible (photos)
20190216		37	2	2	1		Two eaglets photographed
20190222		44	1	2	1		Two large brown eaglets phtographed
20190228		50	1	2	1	2	One eaglet much larger than male parent feeding both
20190309		59	2	2	1	2	Much flapping of wings
20190322		72	0	2	0		One eaglet photographed "helicoptering " or hovering a bit over the nest
20190325		75	0	2	0		Eagles were very quiet and low-- some observers thouth nest was vacant
20190331		81	0	1	1	1	Female eaglet (P Piney 21) had left nest area presumed to have fledged
20190331		81					FIRST EAGLET FLEDGED
20190401		82	2	0	2		Male eaglet fledged
20190401		82					SECOND EAGLET FLEDGED
20190402		83			2	2	Both eaglets returned to nest

20190408	89			2					Both eaglets roosting on nest tree APR 8 & 9
20190412	93		1	1				1	Pride dropped food to the male eaglet
20190417	98		1	2					Both eaglets and Pride on nest
20190429	110		1	2				2	Male parent feeding both eaglets; adult female not seen at nest since APR 19
20190501	111			2					Both eaglet in nest rearranging sticks
20190510	120			0	0				Eaglets absent daily since May 6
20190513	123			2					Both eaglets roosting on nest tree
20190621	162								Juvenile seen flying over east Miramar

2019-2020 Nesting Season

DATE	EGG DAY	HATCH DAY	FLEDGE DAY	ADULTS IN VIEW	NESTLNGS	FLEDGLNGS/JUV	ADULTS ON NEST	FEEDINGS	NOTES
20190824				1			1		Male (Pride) observed on nest
20190909				1			1		Male (Pride) observed on nest
20190921				2			2		Male & Female (Jewel) restoring nest
20190930				2			2		Male in nest, female nearby
20191006				2			2		Male brining in nest, both working on nest
20191022				2			2		One adult in nest, other perched just above
20191029				2			2		Utility work in front of nest but both adults moved to & from nest
20191111				2			2		Both adults working to restore nest
20191116				2			2		Copulation on branch just above nest observed and documented
20191121				2			2		Both adults working on nest all the past week
20191123				2			1		Female sitting in nest sitting high but departed next day-- broody?
20191126				2			2		Copulation observed and documented, on branch above nest
20191130				2			2		Pair exchanged incubation duties, low in nest
20191130	0								FIRST EGG DEPOSITED
20191207	7			2			2		Pair exchanged incubation duties, low in nest
20191224	24			1					Female over Chapel Trail carrying grass in direction of nest (photos)

20200102	33	0							FIRST EGG HATCHED
20200102	33	0		2			2		Incubation exchange, female looking down and "tenting" possible eaglet
20200104	34	2							Feeding and tending at least one eaglet before storm
20209104		2							STORMS DAMAGE NEST JAN 4-10
20200105		3		2			2		Incubation and brooding duties exchanged - tending at least one eaglet
20200110		8		2			2		Both adults repairing damage to nest, no evidence of eaglets
20200110									PRESUME EAGLETS PERISHED BETWEEN JAN 5 & 10
20200119				0			0		No adults seen at nest between JAN 12 & 16, 18 & 19
20200125				2			2		Adults copulated at nest site; prey drop may have been courtship
20200212							1		Incubation may have begun earlier; male seen deep in nest, incubating
20200212	0								PRESUME INCUBATION OF SECOND CLUTCH OF EGGS IS UNDERWAY
20200222	10			2			2		Adults exchange incubation duties
20200309	26			2			2		Adults exchange incubation duties deep in nest
20200314	31			2			1		Female high on nest "tenting" and possibly feeding or tending eaglet(s)
20200314	31	0							PRESUMED HATCH DATE MAR 14
20200322		8		2	1		1		One eaglet seen and being fed in nest
20200408		25		1	2		1		Two eaglets doing well
20200418		35		1	2		1		Two eaglets doing well-- one was hard to see a few days
20200425		42		1	2		1		Female adult feeding eaglets which are tearing at prey on their own
20200509		56			2		0		One of the eaglets was on branch next to nest
20200513		60			2		1		Female eaglet "helicoptering"
20200521		68	1		1	1			Female eaglet fledged and was heard but not seen until May 30
20200521		68	1						FIRST EAGLET FLEDGED
20200603		81	3		2	0			Male eaglet fledged and returned to nest the next day
20200603			3						SECOND EAGLET FLEDGED
20200718		126	16		2		2		Both eaglets continually present in and around nest since June 3

2020-2021 Nesting Season

DATE	EGG DAY	HATCH DAY	FLEDGE DAY	ADULTS IN VIEW	NESTLNGS	FLEDGLNGS/JUV	ADULTS ON NEST	FEEDINGS	NOTES
20201013				2					Nest was noted to be deteriorated and invaded by vines Both adults seen on nest
20201022				2					Both adults roosting by nest
20201030				1					Male roosting at nest
20201116				2					Male not seen for about 2 weeks but both on nest today
20201122				2					Eagles carrying sticks
20201128				2					Eagles building new nest east of old one
20201224				2					New nest appeared nearly complete
20201227				2					Adults seen eating at old nest DEC 27-31
20210105				2					Copulation observed
20210120				2					Female spending much time in nest but also carrying in sticks
20210201				2					Female spending continuously deep in nest
20200201	0			1					INCUBATION ESTABLISHED
